

WRENCHES

WRENCHES

Some technicians claim they can hear the difference when Snap-on® wrenches are dropped – the ringing sound is clearer because of the special alloys. Paying attention to details is what has set Snap-on wrenches apart from all others for more than 85 years.

From the unmistakable luster of the chrome handles to thin wall Flank Drive® Wrenching System on the box ends; from the powerful Flank Drive® Plus open ends – that outperforms every other open end design – to the smooth operation of the ratcheting box mechanisms; Snap-on wrenches have the

balance and feel, and deliver the unmatched performance that technicians all over the world set as a standard.

Snap-on wrenches are proudly made in Elizabethton, Tennessee, by people dedicated to pushing quality to even higher levels.

From left to right:

Ergonomic Adjustable Wrenches

With Snap-on red “Grip” handles, hands stay warm and fatigue less. FADH models grab fasteners away from their corners, providing 137% more turning power. Metric and fractional scales.

Flank Drive Plus Ratcheting Box/Open End

Turns fasteners with up to 80 gear teeth for work in tight areas. Patented Flank Drive configuration, low profile easy action reverse lever and durable Nickel Chrome finish.

High performance Wrenches

These wrenches feature extra length and the smallest profile available; their thin handles get them into areas you can’t reach any other way – without sacrificing strength.

4-Way Angle Head Wrenches

With heads set at 30° and 60° to the handle, you can flip this wrench four times to keep getting a new bite in tough situations. You can do more with Snap-on.

Conventional 12-point wrench and the contact it makes on the corner of a nut or bolt. The corner can round off under high loads causing the wrench to slip.

A Snap-on Flank Drive® wrench moves the contact away from the corner with a radius, and then provides flat-to-flat contact for up to 20% more turning power.

Wrenches FLANK DRIVE® Plus Combination Reversible Ratcheting Box / Open End

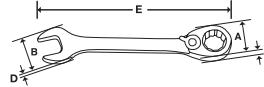

SOEXR20

SOEXR707

- Longer overall length for more leverage to let the wrench do the work
- 12-pt box end features the Flank Drive® wrenching configuration, the proven design for turning fasteners
- Open end features patented Flank Drive® Plus wrenching configuration that delivers up to 62% more turning power than conventional wrenches
- Low profile easy-action reverse lever won't get in your way
- Up to 80 gear teeth requires minimal movement in tight areas
- 15° offset for maximum knuckle clearance
- Meets or exceeds strength specifications in ASME B107.6

Standard Length, 15° Offset

Ratcheting Wrench Adaptors

Use with reversible ratcheting box wrenches like the SOEXRM, BOERM, BOERMF and BOERMS series. Can also be used with the combination ratcheting box wrenches like the OEXRM and OXIRM series. Converts ratcheting wrench into a ratchet. Use reverse lever on wrench to secure or remove adaptor from wrench. Push button on adaptor to release socket.

RWA404FR Set Includes RWA1FR, RWA2FR, RWA3FR and RWA4FR Ratcheting Wrench adaptors.

FLANK DRIVE® Combination Ratcheting Box / Open End Wrenches

OXIR707

OXIRM13

- Up to 80 gear teeth — less than 5° of tooth movement. Less movement required to engage next tooth — ideal in tight quarters
- 12-pt Flank Drive® wrenching system
- Low ratcheting torque — less likely to move loose fastener in wrong direction. Less wasted movement
- Small footprint with 0° offset uni-directional gear. Ideal in tight quarters
- Hardened and constructed from high quality steel. Provides a better fit and yields a long lasting tool
- Tough, durable nickel chrome finish. Looks good, cleans up easily and resists corrosion

FLANK DRIVE® Plus Combination Wrenches

Snap-on® FLANK DRIVE® Plus combination wrenches exceed the limits of any other open end design. The open end features a patented series of flutes or notches that allow the open end to grip a fastener away from its corners much like our box ends do. This gives you up to 62% more turning power and strength* more than any other open end design. (*Increase ranges from 20 to 62% over other open end wrenches on Class 8.8 fasteners.) Force is directed away from the weaker corners of the nut and directed to the stronger flats. You can actually see the grip—in fact, on some fasteners that you don't want marked, you should use our standard wrench. Coupled with our famous FLANK DRIVE® wrenching system on the box end, Snap-on combination wrenches are the overwhelming choice of professionals.

Selection, convenience, and quality. FLANK DRIVE® Plus combination wrenches are available in many different styles and sizes. And just like all Snap-on® wrenches, they are sized for optimum comfort and balance in your hand. **Mirror-like Finish.** Tough, durable, nickel-chrome plating helps protect against corrosion and makes it easy to wipe the wrenches clean. **Patented** under U.S. Patent No. 5,117,714.

WARNING

• Read additional safety precautions on pages 534 to 537.

Wrenches Open End

The ends on the Angle-Head Wrenches have been offset at 30° and 60° angles to the handle. Both ends are the same size to permit the use of one wrench in four different positions to gain additional turning angles.

COEH Handle. Use with COE Series interchangeable ball detent wrench heads only. DO NOT use handle with QJO Series Torque Wrench Heads with locking pin design. Features the comfort and control of a Snap-on® screwdriver style handle. Shank diameter of 1", overall length of 10 3/4".

Aluminum Open End (for AN Fittings)

Securely tighten expensive "AN" fittings without damage in aircraft, marine, industrial applications as well as race and show cars. Machined from aluminum billet to exacting tolerances. Made from quality heat treated hardened aluminum. Corner reliefs on open end wrenches prevent rounding the corners of the fitting. Handle length designed to apply appropriate torque without over tightening. Open end wrenches are color coded and stamped for quick size identification.

AWSGT800 TORX® Set. AWSGT10 thru AWSGT45 (8 pcs) (T10 to T45) in storage tray.

Ergonomic, Soft Grip handle - provides comfort during repetitive tasks, delivers superior turning power, and allows maximum pressure to be applied when loosening difficult fasteners with both "T" and "L" applications. Blades are constructed from high-strength steel and hardened for durability, chrome plated for easy cleanup and resistance to corrosion. Blade tips are black oxide coated to prevent chipping and to help maintain a secure fastener engagement. Short Blade provides maximum torque for tight quarters. Long Blade promotes quick fastener turning in difficult access situations. Hole in Handle for hanging tool or tether. Color coded handles identify tool configuration at a glance.

AWBSGM800 Metric T and L-Shape Ball Hex Wrench Set. AWBSGM2 thru AWBSGM10 (8 pcs) (2 to 10mm) in storage tray.

AWSGT20

AWSGT800

WARNING

- Use only moderate force on crowfoot and flare nut wrenches.
- Frequently inspect, clean, and lubricate ratchet mechanism with light oil.
- Read additional safety precautions on pages 534 to 537.

Wrenches T-Shaped

Coated grip handle provides extra comfort during repetitive tasks while allowing maximum pressure to be applied. Blades are constructed from high-strength steel and hardened for durability. Black oxide coating helps prevent chipping and maintain a secure fastener engagement. Blade length of 9" for quick fastener turning and easier reach to limited access fasteners.

Tools not included with AWSTAND

AWSTAND

Wrench Stand

AWSTAND Wrench Stand. Mounting holes on top and bottom of stand provide for many different mounting locations. Another AWSTAND can be added on either side for increased storage options. Stands can mount to a Slots-N-Dots Plus™ Personal Work Center or lie flat on top of tool box. Stand hold the following combinations of wrench styles:

- L or T-shaped Fractional Hex 1/16" to 3/8"
- L or T-shaped Metric Hex 2 to 10mm
- L or T-shaped Torx T6 to T50
- Metric or Torx® on one stand
- Fractional and Metric on one stand
- Metric and Fractional Ball Wrenches

L-Shaped

Ball Hex Sets

Industrial Finish L-Shaped Ball Hex Wrench Sets:

Ball hex allows up to 25° angle entry. Made from high torque steel.

Standard Sets:

BHS7A Ball Hex Set. Set includes 5/64", 3/32", 7/64", 1/8", 9/64", 5/32" and 3/16" sizes (7 pcs) (5/64" to 3/16") in plastic index.

BHS13A Ball Hex Set. Set includes 0.05", 1/16", 5/64", 3/32", 7/64", 1/8", 9/64", 5/32", 3/16", 7/32", 1/4", 5/16" and 3/8" sizes (13 pcs) (.050" to 3/8") in plastic index.

AWBPH13 Ball Hex Set. Screw holding tip holds fastener to tool for delicate installations. Set includes 0.05", 1/16", 5/64", 3/32", 7/64", 1/8", 9/64", 5/32", 3/16", 7/32", 1/4", 5/16" and 3/8" sizes (13 pcs) (.050" to 3/8") in plastic index.

AWBS13 Stubby Ball Hex Set. Stubby length for access to tight quarters. Set includes 0.05", 1/16", 5/64", 3/32", 7/64", 1/8", 9/64", 5/32", 3/16", 7/32", 1/4", 5/16" and 3/8" sizes (13 pcs) (.050" to 3/8") in plastic index.

Metric Sets:

BHM9A Metric Ball Hex Set. Set includes 1.5, 2, 2.5, 3, 4, 5, 6, 8 and 10mm sizes (9 pcs) (1.5 to 10mm) in plastic index.

AWMBPH9 Metric Ball Hex Set. Screw holding tip holds fastener to tool for delicate installations. Set includes 1.5, 2, 2.5, 3, 4, 5, 6, 8 and 10mm sizes (9 pcs) (1.5 to 10mm) in plastic index.

AWMBS9 Metric Stubby Ball Hex Set. Stubby length for access in tight quarters. Set includes 1.5, 2, 2.5, 3, 4, 5, 6, 8 and 10mm sizes (9 pcs) (1.5 to 10mm) in plastic index.

Wrenches Adjustable

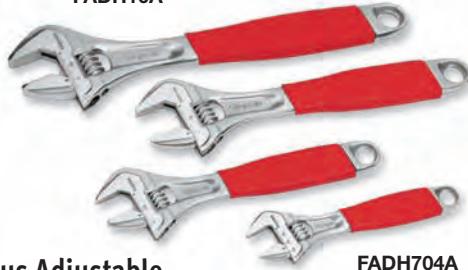

FLANK DRIVE® Plus Adjustable Wrenches with Serrated Jaws feature our patented **FLANK DRIVE® Plus** wrenching system for more turning power than ever from an adjustable wrench. Precision made wrenches feature fractional and metric scales for size reference. Elastomer handle surface is soft yet provides a non-slip gripping surface even for greasy and oily hands. Cushion handle insulates against cold temperatures.

WARNING

- When using adjustable wrenches, make sure jaw is properly tightened. Always pull wrench in direction of fixed jaw.
- Read additional safety precautions on pages 534 to 537.

High Performance / Spline

Snap-on® spline wrenching tools have been developed to service high tensile strength spline nuts and bolts widely used on both military and commercial aircraft.

Precise, radial spline teeth engage the fastener teeth over a wider area to minimize stress, and allow application of high torque without damage to the fastener or to the tool.

Chrome tools comply with Military Spec. MS-33787 and MIL-W-8983. (Industrial finish tools comply with performance specifications and differ only in finish.) The unique patented spline wrenching configuration can also be used on ordinary 6 and 12-point fasteners with an advantage similar to the Snap-on® FLANK DRIVE® wrenching system. U.S. Patent No 3.675.516 and Canadian Patent No. 826,412 apply.

WARNING

- Do not use chrome or industrial finish hand tools with power drivers.
- Frequently inspect, clean, and lubricate ratchet mechanism with light oil.
- Read additional safety precautions on pages 534 to 537.
